## DETAILED ACTION

Claims 78-81, 94, 95, 107, 114, 125-130, 142, and 162-166 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yu, U.S. Statutory Invention Registration H766 (hereafter referred to as Yu).

Yu discloses the invention substantially as claimed (col. 2, 1. 34 to col. 3, 1. 35; col. 3, 1. 67 to col. 4, 1. 20; col. 4, 1. 45-60; col. 5, 1. 21 to col. 6, 1. 8, col. 7, 1. 7-62). Especially note the catalyst used in col. 5, 1. 26 to col. 6, 1. 2, which discloses that a mixture of a metal compound and a phenol may be used as the catalyst, the phenol corresponding to present formula 1 of claim 125.

Yu lacks the specifics of the presently claimed process performed with its disclosed catalyst, especially the particular starting materials which may be polymerized with its catalyst.

However, Yu teaches that these starting materials may be polymerized with another disclosed catalyst similar to that of the present claims.

It would have been obvious to one of ordinary skill in the art to apply that skill to the disclosure of Yu with a reasonable expectation of obtaining a highly-useful process for making a polyester with the expected benefit of the process not requiring metals conventionally used in polyester production.

Claims 82-92, 96-106, 108-113, 115-118, 131-141, and 143-166 are objected to as being dependent upon a rejected base claim, but would be

allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James E. McDonough whose telephone number is (571)272-6398. The examiner can normally be reached on 8:30am-5:00pm.
